### **Reasons for allowance**

1. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach the combination of limitations in the independent claims 1, 28, and 45, especially, "persisting user defined functions and configuration files for a similarity search server in one or more remote database management systems; ...generating one or more commands by the similarity search server from the client request; sending the one or more commands from the similarity search server to the one or more remote database management systems; executing the one or more commands in the one or more remote database management systems to determine normalized document similarity scores using the persisted user defined functions and configuration files in the remote database management systems; determining normalized document similarity, scores in the remote database management systems using, choice algorithms, the choice algorithms using weighting functions applied to results of measure algorithms that determine document leaf node attribute similarity scores; generating a search result by aggregating the similarity scores from the one or more remote database management systems"

2. Dependent claims 2-27, 29-44, and 46-47 incorporate the listed limitations by reference and contain limitations that further distinguish over the art of record.

Art Unit: 2163

For these reasons, claims 5 2-27, 29-44, and 46-47, are considered allowable over the art of record.
